

Operating a Legal Practice That Processes Medical Imaging Evidence?

RamSoft knows your pain

We know it can be a “trial” for today’s legal practices to manage digital evidence, specifically medical images and reports, meaning firms like yours face the pressing need for:

Eliminated time, expense, and delays involving the mailing and tracking of CDs containing case-relevant medical images and reports.

Simplifying trial preparation and presentation of medical imaging evidence by employing DICOM® medical image information to exhibit as convincing, effective evidence in court.

Quick and easy access to medical images and reports via secure links, versus the conventional use of attorney portal logins or computers with optical drives.

Secure sharing of medical images with various expert witnesses and consulting professionals for review and analysis.

Improved data security and organization encompassing comprehensive, cloud-enabled file storage, data transfer, and archiving/indexing of digital data and evidence.

A single image viewer to view medical images that is compatible across multiple systems and viewing solutions.

A reliable, robust cloud-based platform promoting compliance with healthcare industry standards and regulations including HIPAA.

Thorough protection against the latest in cyber threats, risks, and attacks.

How RamSoft solves your pain points

RamSoft's novel cloud-native imaging software solution, OmegaAI®, is fully equipped to perform within the digital landscape in which today's legal profession operates. Easily drive growth and enhance client relationships with optimized productivity, automated workflows, and reduced costs through:

➤ Seamless Integration & Interoperability

Leveraging extensive support for HL7®, DICOM, IHE, and FHIR®, easily integrate any existing new and legacy systems employing the flexibility of OmegaAI®'s cloud-native product design.

➤ Secure and Easy Sharing

Quick, secure medical image & report sharing via the latest innovations such as QR codes and unique study links (can be automated!) that simplifies collaboration and communication between all key members of a client's legal team, including expert witnesses, medical imaging sources, and investigation specialists.

➤ Cloud-Enabled Data Management

OmegaAI® provides a secure, cloud-native platform to securely store, transfer, and archive data...offering an in-built vendor neutral archive.

➤ Enhanced Interconnectivity

Easily connect to various networks and systems to facilitate secure, TLS-encrypted data sharing with OmegaAI®'s unique data linking feature, OmegaAI LINK — it comes as a "zero-cost to install" feature and is easy to maintain via centralized management.

➤ Comprehensive Industry Compliance

OmegaAI® offers extensive industry compliance including HIPAA, The Cures Act (U.S.) as well as SOC 2 Type II and ISO 13485 certifications.

➤ Incomparable, Worry-Free Cybersecurity

Built on Microsoft Azure, OmegaAI® draws upon the power of Microsoft's extensive cloud security knowledge, expertise, and safety.
