

Conducting Personal Injury Imaging?

RamSoft knows your pain

Whether treating patients with personal injuries or providing imaging services for personal injury legal cases, your requirements of a secure, reliable imaging software solution are specific to:

Quickly generating accurate, detailed diagnostic imaging reports that are actionable in evidence provision for legal proceedings as well as facilitating timely, responsive care for patients.

Ensuring smooth connectivity that supports effective collaboration & communication between medical specialists and legal professionals.

Reducing wait times for imaging results through **accelerated image processing** for faster diagnoses, treatment strategies, and recovery monitoring for patients.

Promoting **secure, HIPAA-compliant sharing** of patient PHI including diagnostic images and reports

Leveraging cloud technology to allow secure access and viewing of patient images & reports from anywhere, at any time.

Discover RamSoft's cloud-based/cloud-native imaging solutions

Optimize your personal injury operation with the above benefits and more via:

PowerServer®, **OmegaAI®**, and **Blume®**.

How RamSoft solves your pain points

RamSoft's novel cloud-based and cloud-native software solutions are hosted on top of the Microsoft Azure Cloud platform, equipping them to drive accelerated imaging and patient care for today's personal injury imaging operations...supported by unrivaled cybersecurity, reliability, and scalability:

➤ **Faster Image Processing**

Rapid DICOM® routing and pre-caching reduce waiting times for crucial patient studies. (OmegaAI®'s exclusive Progressive Loading feature allows for immediate reads and interactions of new studies with no delay by direct loading of initial images and quick, progressive loading of secondary ones!)

➤ **Customized & Automated Workflows**

Reduce tedious manual tasks with advanced time-saving automation and customization that streamlines workflows as needed. Effortlessly prioritize and triage imaging requests and improve the efficiency of the entire imaging and reporting process. (OmegaAI®'s modern interface simplifies creating multiple actions and conditions such as triggers for automatic notifications/alerts and report distribution.) Advance workflow automation further in PowerServer® and OmegaAI® with RamSoft's integrated AI partner solutions such as CARPL, NewVue and RADPAIR

➤ **Full-Scale Industry Compliance & Certifications**

RamSoft's solutions offer extensive industry compliance including HIPAA, The Cures Act (U.S.) as well as SOC 2 Type II and ISO 13485 certifications.

➤ **Enhanced Data Sharing & Interconnectivity**

Easily connect various sites and networks to facilitate secure, TLS-encrypted data sharing with OmegaAI®'s unique data linking feature, OmegaAI® LINK — it comes as a "zero-cost to install" feature and is easy to maintain via centralized management.

➤ **Exceptional Interoperability**

Extensive support for HL7®, DICOM, IHE (and FHIR® in OmegaAI®) allows you to connect your imaging modalities and techs smoothly and securely with automated routing and worklists.

➤ **Secure and Easy Sharing**

Quick, secure image sharing via the latest innovations such as QR codes and study links (can be automated!) that simplifies collaboration and communication between patients, attending and referring physicians and other consulting healthcare team members and departments, as well as attorneys and insurance companies.

➤ **Patient Engagement That Empowers**

Blume® enables patients to book appointments, and view or share images and reports with other healthcare providers or friends and family members...right from their smartphone! Additionally, AI-powered definitions allow patients to easily understand complex medical report terminology by simply highlighting the word in the report and receiving the definition from AI.

➤ **Seamless Integration**

Easily integrate any existing new and legacy systems employing the flexibility of cloud-based (PowerServer®) and cloud-native (OmegaAI®) product design.

➤ **"Assistive Intelligence" (AI)-Generated Report Summary**

With RamSoft's integrated AI partner solutions, radiologists can speed up generating radiological reports with the assistance of built-in transcription technology that automatically corrects everything including punctuation and errors.
